FRAMELESS GLASS ENCLOSURES

Installation Instructions

Model

TE/SE

Frameless Bypass Tub / Shower Enclosure

To install your shower enclosure, you will need the following:

- Level
- #31 Drill Bit
- 3/16" Carbide Drill Bit (for tile walls)
- Phillips Screwdriver
- Silicone
- Hack Saw
- 1/4" Box End Wrench

Description	Qty	Part No.	Picture
1. Wall Jamba	2	ZTE-1203	
2. Wall Anchors	6	ZV-935	
3. #8 x 1-1/4" Screws	6	#8 x 1-1/4"	
4. Door Bumpers	2	ZV-924	
4a. Bottom Bumper	1	ZV-926	
5. 6-32 x 1/2" Screw	2	6-32 x 1/2"	
6. Bottom Sill	1	ZTE-1222	
7. Center Guide - 3"	1	ZV-920	
8. Header	1	ZTE-1201	
9. Towel Bar Bracket	1	ZTE-2206	
10. Towel Bar Bracket With Pull	1	ZTE-2206P	
11. Towel Bars	2	ZTE-2206	
12. Inside Door Pull	1	ZTE-2207	
13. #6 x 3/8" Screw	6	#6 x 3/8"	
14. Handle Vinyl	3	ZV-914	
15. Roller Bracket Assembly	4	ZTE-1208	
16. Inside Glass Panel	1	Inside Slider	
17. Outside Glass Panel	1	Outside Slider	
18. Curb Vinyl with ZTE-1222	1	ZV-918	

When ordering repair parts, please give the following information:

1. Model Number
2. Part Number
3. Part Description
4. Color

FIGURE 1

Note: Apply a bead of silicone (GE 1200) into the open channel of roller bracket before attaching to glass. To assemble roller bracket (15) to glass, tighten screws until surface of roller bracket is depressed 1/32" (28 inch pounds of torque). Allow to cure for 24 hours before hanging sliders.

1. Set Wall Jamb (1) in place on walls, centering bottom of jamb on rim of tub. Hold plumb and mark walls for screw holes.

2. Remove and drill 3/16" diameter holes in walls (use a carbide tipped drill bit for tile walls). Insert plastic wall anchors (2) into holes. Silicone where the wall meets the rim of the tub to seal the bottom of jamb. Set jamba in place and

secure to the wall with #8 x 1 1/4" screws (3). Secure Bottom Bumper (4a) on shower head/ inside side with the bottom wall jamb screw.

3. Cut Sill (6) to fit opening between jamba. Run a bead of silicone full length to the underside of sill (See Figure 2) and apply silicone to inside of jamb where jamb meets tub. On inside of jamb, run a 1/4" bead of silicone 1 1/4" up the outside leg of each wall jamb (See Figure 2). Set curb in place, then press firmly to rim of tub. Wipe off any excess silicone before curing. Use tape to hold in place until silicone sets.

FIGURE 2

4. Cut Header (8) 1/32" to 1/16" less than opening width and set in place.

5. To set slider glass in place, hold inside slider inside of tub or shower pan, insert rollers up into header and lower into place. The inside will close against the wall jamb on the shower head side. Next, insert lower end of outside slider in front of inside slider by pushing lower ends far enough in, to allow clearance on inside edge of tub or pan. Avoid roller bracket to roller bracket contact while lifting panel into place. The outside slider will close against the jamb opposite the shower head.

6. Place center guide (7) to center position on sill (See Figure 2). Make sure the center guide is hooked into the slot position on the sill, then snap center guide to sill.

7. Close panels and adjust to align the vertical edge of panels with jamba. Using a 1/4" box-end wrench, loosen the screws on the rollers, but don't remove completely. When screws are loose, adjust panel by sliding the screw in the slot. **Note:** When screws are loose be sure to support panel so it does not fall and break. Adjust inside slider as low as possible to reduce the gap between bottom of slider and sill taking care that the glass does not drag on the track or center guide.

8. Set handle vinyl channel (14) in place over edges of outside glass panel (17) with bottom of vinyl in line with bottom of bumper. Tap towel bar brackets (9 & 10) in place. Bracket with pull should be to

FIGURE 3

jamb side of slider opposite shower head. Assemble towel bars (11) to brackets using #6 x 3/8" screws (13).

9. Set handle vinyl (14) in place over edge of inside glass panel (16) with bottom of vinyl in line with bottom of bumper on edge facing the wall jamb (1). Tap inside door pull (12) in place. **Note: Large Portion of Pull to Inside of Slider.** This panel should be at the shower head/ Inside side.

10. Center hole in jamb is slotted to allow adjusting of jamb to compensate for

bowed glass. After installing hardware, roll both panels into jamb on one side. If edge of glass hits on edge of jamb, loosen center screw and adjust jamb accordingly. Repeat on opposite side. From inside of unit, drill #31 holes through header and into wall jamb. Secure header to wall jamba with two #6 x 3/8" screws (13).

11. Secure bumpers (4) in place with a 6-32 x 1/2" screw (5). **Note:** Glass panels close into the recessed portion of the bumpers. The recess is toward the inside of the tub on the shower head jamb, and toward the outside on the other jamb.

12. Silicone inside of shower where jamba meet walls and sill meets rim of tub.
